EXECUTIVE PROFILE

Undergraduate Data Science scholar at Kumaraguru College of Liberal Arts and Science (Mahatma Gandhi Merit Scholar) with a focus on Applied Machine Learning, network traffic intelligence, and venture prototyping. Active ecosystem leader as LEED Director and Class Representative with proven expertise in organizing premier summits, spearheading podcast media, and translating theoretical algorithms into real-world software and hardware prototypes.

EDUCATION

Bachelor of Science in Data Science (B.Sc. Data Science)

2024 – Present

Kumaraguru College of Liberal Arts and Science (KCLAS) · Coimbatore, India

- **Honors & Awards:** Awarded the prestigious **Mahatma Gandhi Merit Scholarship (2025–2026)** by Kumaraguru Institutions for exemplary academic excellence and ecosystem contribution.
- **Coursework:** Statistical Computing, Machine Learning, Python Programming, Database Management (SQL), Data Structures, Applied Linear Algebra, Business Analytics.

RESEARCH & PUBLICATIONS

Network Traffic Type Categorization Using Machine Learning

August 18, 2026

ICCSAM 2026 · VETIAS & Asia Pacific University of Technology and Innovation (APU), Malaysia

- Author & Presenter at the *3rd International Conference on Computational Sciences and Applied Mathematics*.
- Designed and evaluated supervised machine learning classifiers on statistical flow-level behavioral signatures to classify encrypted network traffic without violating payload encryption (TLS 1.3 / QUIC).
- Achieved high classification accuracy with low computational footprint, enabling real-time edge network monitoring.

LEADERSHIP & ECOSYSTEM INITIATIVES

LEED Director & Executive Organizer

2024 – Present

Leadership, Entrepreneurship & Ecosystem Development Cell

- **Institutional Podcast Series:** Directed and hosted student and entrepreneur interview series uncovering real business mechanics and startup trajectories.
- **Entrepreneurship Summit (E-Summit):** Organized collegiate summit connecting student innovators with industry founders, orchestrating panels and logistics.
- **Shark Tank Competition:** Designed problem statements, judged pitch decks, and mentored student ventures on valuation and unit economics.

Class Representative (Semester 2)

2025

Department of Data Science · KCLAS

- Coordinated academic schedules, resolved logistical bottlenecks between faculty and 50+ students, and fostered collaborative peer study cohorts.

SPECIALIZED PROGRAMS & FELLOWSHIPS

ProtoSem Fellow

Forge Innovation

Comprehensive immersion in industrial innovation, systems thinking, sensor integration, and translating computational models into functional hardware-software prototypes.

Venture Building Bootcamp

River Venture Studios, Singapore

Intensive global venture accelerator program focused on lean validation, unit economics, market testing, and investor pitch deck formulation.

KEY PROJECTS

Automated Traffic Signal Control System Using AI & Computer Vision

Python · OpenCV · YOLO

- Developed dynamic signal timing adjustment based on real-time vehicle density analysis from intersection camera feeds, decreasing idle congestion by ~28%.
- Supply Chain Demand & Inventory Forecasting Engine**

Python · Scikit-Learn · Pandas
- Engineered time-series regression pipeline analyzing multi-echelon retail sales data to predict stockouts and automate reorder alerts with 92% seasonal precision.

TECHNICAL & PROFESSIONAL SKILLS

PROGRAMMING & DATA	Python (Pandas, NumPy, Scikit-Learn, TensorFlow, PyTorch), SQL (PostgreSQL, MySQL), R, JavaScript, HTML5/CSS3
ANALYTICS & ML	Supervised & Unsupervised Learning, Feature Engineering, EDA, Time Series, Computer Vision basics
TOOLS & PLATFORMS	Git & GitHub, Microsoft Excel (Advanced Pivot & Modeling), Tableau, Power BI, VS Code, Linux Edge Tools
LEADERSHIP & SOFT	Public Speaking, Cohort Management, Event Organizing, Podcast Production, Problem Framing
